Notice of Allowability	10/624,527	HIBINO ET AL.
	Examiner	Art Unit
	Jane Rhee	1745
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to 6/14/2007.		
2. The allowed claim(s) is/are		
3.		
Attachment(s)  1. Notice of References Cited (PTO-892)  2. Notice of Draftperson's Patent Drawing Review (PTO-948)  3. Information Disclosure Statements (PTO/SB/08), Paper No./Mail Date  4. Examiner's Comment Regarding Requirement for Deposit of Biological Material	5.  Notice of Informal 6.  Interview Summa Paper No./Mail D 7.  Examiner's Amen	Patent Application ry (PTO-413), Date

Application/Control Number: 10/624,527

Art Unit: 1745

## Reasons For Allowance

The following is an examiner's statement of reasons for allowance: The prior art fail to teach, suggest, or provide a rationale to one in the ordinary skill in the art to provide a separator with a bypass that connects an upstream-side stage of the gas passage to a downstream side stage of the gas passage and that causes a gas that flows in via an inlet of the bypass to flow out of an outlet of the bypass wherein a gas inlet of the separator and a gas outlet of the separator are located at a same side of the separator and opposite to the bypass. Applicant teaches that since the bypass is provided, a high concentration gas present at the upstream side is conducted to the downstream side via the bypass so that the gas concentration drop at the downstream side is curbed and therefore the state of power generation improves. Furthermore, at the time of high current density, a large about of water produced at the upstream side flows to the downstream side via the bypass, and therefore can be promptly discharged from the system so as to prevent the reaction produced water to impede the supply of as to an electrode which causes a reduction of power generation performance (specification page 3).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/624,527

Art Unit: 1745

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jane Rhee whose telephone number is 571-272-1499. The examiner can normally be reached on M-F 9-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
